

# This Summer,

Your Child Gets **Ahead**.  
And Loves **Every Minute**.

**Math & English**

Starts **June 1st, 2026**

McKinney & Irving | Grades K-9 | In-Person | New batches every 2 weeks

2 Weeks | 10 Sessions | 30 Hours | June & July

\*This brochure is for Grades 2-3

# 10 Sessions

## The First Step of a Much Longer Journey

This summer plants the seed. The Bhanzu Learning Center annual program is where it grows.

### Real-World Math Learning

Traffic lights. Google Maps. Secret codes. Every concept connected to something real — so it sticks.

### Rigorous by Design

Every concept is taught to mastery. The fun is the method. The rigor is the outcome.

### Learning Through Doing

Activities are not extras here. The game is the discovery. And when discovery is this engaging, the hard work does not feel hard.

### Confident English Expression

Creative Writing, Public Speaking, news reporting, and JAMs — children learn to think clearly and speak confidently.

### The Beginning of a Longer Journey

Summer Basecamp is Chapter 1. The Bhanzu Learning Center annual program is what comes next.

Two weeks that start something much bigger.

## What Your Child Will Learn

Every course runs for 2 weeks — 10 sessions of 3 hours each. All courses are in-person, small-batch, and taught by certified Bhanzu Learning Center instructors.

GRADES 2-3 | Math + English

### Course 1

## Arithmetic, Geometry & Art + Reading, Writing & Grammar

Kids solve puzzles and build shapes, then write and perform their own mystery story — with a plot twist.

### Week 1

#### Math:

- Add & Subtract
- Patterns
- Estimation
- Multiplication
- Puzzles & Fun I

#### English:

- Reading Basics
- Characters & Settings
- Plot & Clues
- Sentence Formation
- Vocabulary Building

### Week 2

#### Math:

- Circles & Time
- Fractions
- Symmetry
- Area
- Puzzles & Fun II

#### English:

- Speed Reading
- Plan Your Story
- Write Your Story
- Edit & Improve
- Rehearse Reading Aloud

**Course 2**

## Algebra, Data & Logic + Public Speaking

Kids crack codes and think in algorithms, then find their voice through JAMs, puppet shows, and live performances.

### Week 1

#### Math:

- Add & Subtract
- Finding the Unknowns
- Networks & Maps
- Recursion & Algorithm
- Winning Strategies

#### English:

- JAM — Just a Minute
- Story Narration
- Picture Description
- Poetry Recitation
- Puppet Show

### Week 2

#### Math:

- Place Value
- Multiplication
- Sorting & Comparing
- All About Graphs
- Coordinates & 2D World

#### English:

- Mime
- Speak Like a Pro
- News Reporting
- Advertisement Pitch
- Rehearsal Day

# The Man Behind The Curriculum

**Neelakantha Bhanu Prakash**

Founder & CEO  
World's Fastest Human Calculator

**BBC**

"Neelakantha Bhanu Prakash is the Usain Bolt of mathematics."

## Why He Built This

- Bhanu did not build Bhanzu Learning Center to create another math program.
- He built it because he believed every child is capable of genuinely loving math: Not tolerating it, not getting through it, but loving it.
- The Summer Basecamp is the most direct expression of that belief: a curriculum he designed personally, where rigor and joy are never in conflict.
